

MEETING REPORT

Team Name: AC Supply Chain AI **Date of Meeting:** 14 April 2025

Start Time: 10:00 **End Time:** 12:00 **Meeting Location:** Faculty Computer Lab, Room 204

Moderator: Natali Muca **Recorder:** Sabina Merkaj

Other Members Present: Enisa Halilaj, Natali Muca, Sabina Merkaj,
Alesia Palloshi, Alesia Gjeta

Members Absent: None

Topics Discussed:

- Walkthrough of FastAPI project scaffold and folder structure created by Natali.
- Review of PostgreSQL schema: entities, relationships, and the custom delay_risk ENUM type.
- Discussion of the ProductOut schema issue: supplier_id needed to be made optional.
- Review of JWT authentication design: login endpoint, token generation, and middleware for protected routes.
- Discussion of seed_db.py requirements: 7 anomalous orders with ANOM-prefixed IDs, correct DelayRisk enum values, required DemandRecord fields.
- Frontend wireframe walkthrough by Alesia Palloshi: dashboard layout, inventory table, Chart.js forecast graph.
- ARIMA feasibility discussion: per-category models vs. single generic model — per-category approach agreed upon.

Decisions Made:

- ProductOut schema: supplier_id is optional (not all products have a linked supplier at query time).
- ARIMA models will be trained per category, not as a single generic model — avoids overfitting to unrelated demand patterns.
- seed_db.py must include: date and revenue in DemandRecord; DelayRisk enum not raw strings; supplier_id on all products.

- Anomalous orders will use ANOM-prefixed order IDs (e.g., AC-2025-ANOM-001) to support the anomaly detection pipeline.
- Frontend pages confirmed: Dashboard (KPIs + Chart.js), Inventory, Demand Forecast, Anomaly Detection, Suppliers.

Tasks Assigned:

- Implement JWT login, register, and middleware; fix ProductOut schema — Natali Muca (due: 18 Apr)
- Run migrations, fix seed_db.py with correct enums and required fields — Sabina Merkaj (due: 18 Apr)
- Build HTML pages: dashboard shell, inventory table, navbar — Alesia Palloshi (due: 18 Apr)
- Prototype ARIMA per-category training script; test on sample demand records — Alesia Gjeta (due: 18 Apr)
- Merge all feature branches into main; resolve conflicts — Enisa Halilaj (due: 18 Apr)

Time, Place, and Agenda for Next Meeting:

- Monday, 21 April 2025 at 10:00 — Faculty Computer Lab, Room 204. Agenda: Integration testing of backend + DB; demo of auth flow; first look at ARIMA forecasts; inventory page review.
