

MEETING REPORT

Team Name: AC Supply Chain AI **Date of Meeting:** 28 April 2025

Start Time: 10:00 **End Time:** 13:00 **Meeting Location:** Faculty Computer Lab, Room 204

Moderator: Enisa Halilaj **Recorder:** Alesia Gjeta

Other Members Present: Enisa Halilaj, Natali Muca, Sabina Merkaj,
Alesia Palloshi, Alesia Gjeta

Members Absent: None

Topics Discussed:

- Final end-to-end walkthrough: authentication, dashboard, inventory, demand forecast, anomaly detection, supplier management.
- Review of all open GitHub issues and PRs; final merge to main branch.
- Confirmation that anomaly detection hybrid approach (ANOM-prefix + rule-based) works correctly with seeded test data.
- Verification that per-category ARIMA models train, save, load, and predict correctly for all product categories.
- Review of each team member's file responsibilities for grading — confirming no over-inclusion of files outside each person's scope.
- Presentation rehearsal: each member presented their contribution section (approx. 5 minutes each).
- Final review of project documentation, README, UML and ERD diagrams to be submitted.

Decisions Made:

- System is fully functional and ready for submission; no breaking issues remain.
- File-scope grading documentation confirmed per member — each person's guide covers only their responsible files.
- Enisa's file set is intentionally small (repo management, CI, README); her guide reflects this accurately.

- All diagrams (UML Use Case, Activity, State; ERD Crow's Foot; DFD Level 0) to be submitted with the codebase.
- Submission package: GitHub repository link + documentation folder + presentation slides.

Tasks Assigned:

- Final README polish and submission package assembly — Enisa Halilaj (due: 30 Apr)
- Deploy final version; confirm all endpoints respond correctly — Natali Muca (due: 30 Apr)
- Final DB migration on clean environment; confirm seed runs without errors — Sabina Merkaj (due: 30 Apr)
- Final frontend QA pass; ensure all pages load and Charts render — Alesia Palloshi (due: 30 Apr)
- Package ML models; confirm ARIMA + anomaly detection runs on fresh environment — Alesia Gjeta (due: 30 Apr)

Time, Place, and Agenda for Next Meeting:

- To be scheduled after submission. Agenda: Post-submission debrief; feedback review after grading.
