Moderator: Enisa Halilaj **Recorder:** Natali Muca

Other Members Present: Sabina Merkaj, Alesia Palloshi, Alesia Gjeta

Members Absent: None — all 5 members attended

Topics Discussed:

1. Review and demo of all Week 6 features across all team branches
2. AI Agent endpoints — priority scoring, reasoning, supplier compare, proactive alerts
3. Customer portal (customer.html) — public product availability without login
4. Floating chat widget — voice input, proactive badge, and action buttons
5. Reorder Alerts — per-branch stock scanning with urgency classification
6. Final work division, file ownership per team member, and git push strategy
7. Personal logs format and submission requirements
8. Final merge to main and submission packaging

Decisions Made:

- inventory.py (public endpoints) assigned to Enisa Halilaj (API endpoints role)
- Natali Muca retains ownership of auth.py and auth section of router.py
- Alesia Gjeta owns ml.py covering all AI Agent and ML endpoints
- Alesia Palloshi owns index.html and customer.html as frontend contributor
- Sabina Merkaj owns models.py and seed_db.py as database contributor
- Each member pushes only their own files to their own feature branch
- Enisa Halilaj performs the final merge of all branches into main
- Meeting report and personal logs submitted alongside the code

Tasks Assigned:

Enisa Halilaj — Final merges, repo management, public API endpoints (inventory.py, router.py)

Natali Muca — Backend authentication endpoints (auth.py, router.py)

Sabina Merkaj — Database models: SearchLog, CompetitorPrice, AgentRecommendation (models.py)

Alesia Gjeta — All AI Agent and ML endpoints, priority scoring, chat, reorder alerts (ml.py)

**Alesia Palloshi — Full frontend: AI Agent UI, floating chat, customer portal
(index.html, customer.html)**

Time, Place, and Agenda for Next Meeting:
